T-Wheel: 283

The latest and greatest in our MAX series of bows is the MAX3000

The first MAX launched in 1999 and has been our most successful bow to date. 5 years of on going development has cumulated in a highly refined piece of equipment, Unmatched in both performance and quality.

Whether your chosen discipline is target, field, 3D or hunting this is best all round top performer you are going to find anywhere.

Max-Xtreme

MAX-XTRME

SHERWOOD
MERLIN
FOREST

Specifications

Axle Length: 33"

Brace Height: 8"

Mass Weight: 4lb

Riser Length: 23"

Limb Length: 15"

Peak Speeds

Omega Cam: 290

Compact axle length, wonderfully smooth to shoot and very quiet.

Utilizing the proven geometry of the MAX riser, and the high performance Omega Cam system this is an absolute MUST for all serious bow hunters.

Quest 35

Specifications

Axle Length: 35"
Brace Height: 8"
Mass Weight: 3lb 10oz
Riser Length: 18.25"
Limb Length: 16"

Peak Speeds

Omega Cam: 290
Rapid 2 (Target): 290
Rapid 2 (Turbo): 300
T-Wheel: 275

35" in length and generous brace height makes this yet another highly versatile bow.

Superb for hunting or a fantastic target bow for ladies and shorter draw length archers. Lightweight, fast and very quiet. The Quest 35 should be a serious contender when choosing your next bow.

Try one for yourself... And be impressed.

Supernova

Specifications

Axle Length: 40.25"

Brace Height: 9"

Mass Weight: 4lb 3oz

Riser Length: 23.25"

Limb Length: 16"

Peak Speeds

Omega Cam: 280

Rapid 2 (Target): 280

Rapid 2 (Turbo): 290

T-Wheel: 265

When designing the Supernova we had just one goal in mind. Produce the most accurate bow possible. Steadiness of aim, forgiveness and the highest build quality were all prerequisites.

The advancement of today's manufacturing techniques brings this classic D-Flex designed target bow back to the forefront of competitive archery.

Vision Plus

VISION PLUS

Specifications

Axle Length: 39.75"

Brace Height: 7.2"

Mass Weight: 4lb

Riser Length: 21.5"

Limb Length: 16"

Peak Speeds

Omega Cam: 298

Rapid 2 (Target): 298

Rapid 2 (Turbo): 308

T-Wheel: 283

Vision

Pro-Fusion carbon limbs, CNC machined riser and pockets, top of the line cam systems, excellent finish and attention to detail..

What more could you ask for?

How about a bow that offers all these features at a price that puts all other bows to shame? The Vision does just that. Unbeatable quality at an unbeatable price.

Cams

Omega

Cams have evolved. The Omega 'Hybrid' cam is that next step in the evolution of cam technology. Taking the best qualities of Single Cams, and blending them with the best qualities of Twin Cams results in a system that does, finally, offer everything. 60% and 70% let off options. 1/2" adjustable over a 3" range via interchangeable modules. Rock solid wall, smooth, fast, quiet... Don't take our word for it. Contact a Merlin dealer and try one out for yourself! You will be amazed!

Rapid 2

The Rapid 2's are at the forefront of Twin Cam design, so if your looking for a 'pure twin' you can't go wrong with the Rapid 2's. Available in two styles:- A super smooth 'target' version or an incredibly fast 'Turbo' version. And the great thing about this is that they are the same cam! You can simply switch the modules from 'Target' to 'Turbo' and boost your speed. 65% let off. 1/2" adjustable over a 3" range via interchangeable modules.

T-Wheel

The smoothest drawing cam we have ever made. If your looking for a cam design for ease of draw and maximum forgiveness then this might be the one for you. A very gradual increase in draw weight, with a short peak, and a gradual decrease in weight gives this cam the impression you are shooting a much lower poundage.

Very quiet, with virtually no shock and recoil, these T-Wheels are an absolute pleasure to shoot. 55% or 65% let off.

Riser Colours

Pro-Fusion Limbs

Pro-Fusion is a state of the art manufacturing process used to infuse molded limbs under total vacuum.

Each pair of limbs is cut from the same 1 meter panel guaranteeing extreme accuracy.

The result? Only the most efficient, stable, perfectly matched limb platform you are ever going to find.

SYNTECH LIMB FACINGS

Laminated skins on the surfaces of the limbs reduce high frequency sonic vibration as well as adding limb protection

LIMBS

Introducing two new recurve bow limbs, manufactured for Merlin by the world leader in recurve limb technology, Border Archery.

Regarded by many as the finest limb makers in the world, Border Archery have been producing limbs for more than 60 years. Their name has always been associated with outstanding quality and incredible performance.

The 'Elite Synthetic' and the 'Classic Carbon' are the cumulation of 6 decades of experience and we are proud to have them in our line up.

Completely machined from a solid billet of 6082-T6 aluminium, and finished to a high standard the Merlins look every bit as good as they shoot.

The Elite features a simple, reliable, limb dovetail adjustment for perfect limb to riser alignment.

Adjustments can easily be made with the bow fully assembled.

Utilizing the most advanced materials available, the ELITE SYNTHETIC bow limbs are the pinnacle of recurve limb design.

Totally weather proof, very fast and very stable.

The CLASSIC CARBON limb features a tried and tested hard rock maple core, with multiple laminates of carbon and glass. The result is a limb of outstanding performance and reliability.

Manufactured with precision and passion
